Profile

I enjoy the point where a website becomes a working tool: a customer completes an order, a barber manages the day's appointments, or a client updates their own content. Through freelance projects, I've built both the interfaces people see and the data workflows behind them. I bring that practical experience to frontend and full-stack development, with a particular interest in thoughtful interfaces and useful business software.

Experience

Freelance Web Developer *2026*

Independent client projects Remote / Slovenia

- Delivered websites and applications for clients in e-commerce, tourism, personal services, and professional services, from requirements and design through deployment.
- Worked directly with clients to define scope, incorporate feedback, and adapt interfaces to their day-to-day needs.
- Built additional tourism and personal-service websites, plus a professional website with an admin panel for independent content management.

Selected Projects

Barbershop Booking & Operations Platform *2026*

React, Vite, TypeScript, Supabase, TanStack React Query

- Connected appointments, clients, services, staff schedules, and payment records in a single responsive admin application, with Supabase authentication and admin-only route protection.
- Built list and calendar booking views with six appointment statuses, editable pricing, internal notes, and end times calculated from service duration.
- Used database triggers to update client visit/spending totals when appointments are completed; refreshed booking views and dashboard data through realtime subscriptions and query invalidation.
- Implemented staff invitations, profile images, service archiving and reordering, recurring weekly availability, and time-off management.
- Added revenue breakdowns by service and barber, peak-hour views, CSV exports, and business and notification preferences, including booking-window and cancellation-policy settings.

BeHome — E-commerce Platform *2026*

Next.js, React, TypeScript, Tailwind CSS, Redux Toolkit, Supabase

- Developed product browsing and checkout flows, using Redux Toolkit to manage client-side application state.
- Integrated Supabase for data and authentication; delivered the customer-facing store on its own domain.

SilberBerg — Multilingual Brand Website *2026*

Next.js, React, TypeScript, Tailwind CSS, GSAP, Lenis, next-intl

- Implemented multilingual content with next-intl and coordinated animation and smooth scrolling with GSAP and Lenis.
- Integrated Vercel Analytics and launched the production website at silberberg.si.

Private projects and admin workflows can be demonstrated during an interview or meeting.

Technical Skills

Frontend	TypeScript, JavaScript, React, Next.js, Vite, HTML, CSS, Tailwind CSS
Data & application logic	Supabase, Redux Toolkit, TanStack React Query, Zod, React Hook Form
UI & interaction	shadcn/ui, responsive layouts, component systems, GSAP, Lenis
Development & delivery	Git, GitHub, Vercel, ESLint, Prettier

Education

University of Primorska, FAMNIT Koper, Slovenia

B.Sc. in Computer Science — in progress

Languages: Macedonian (native); English, Slovenian, Bulgarian, German.
